

Medical experts weigh in on the FREAKIEST FACES IN HOLLYWOOD!

BARRY MANILOW
Mani-whoa! "He seems to have had multiple facelifts and fat transferred to his cheeks," said Dr. David Shafer. "He looks like a puppet."

BIG ANG

This "Mob Wife" is a walking crime wave to plastic surgeons. "She's had nose jobs and her cheeks and breasts have been blown up," said Dr. Anthony Youn.

LIL' KIM
Docs said the major renovation on her face is one bad rap. "She's had multiple nose jobs, cheek implants, eye tilting, lip injections, Botox ... and more," stated Dr. Otto Placik.

MICKY ROURKE

This former boxer took a bigger beating on the operating table than he ever did in the ring. "His face is mask-like and swollen," says Dr. Ramtin Kassir. It's time to throw in the towel, Mick!

STEVEN TYLER
Dude Looks Like A Bag Lady. "I suspect several nose jobs, facelifts and regular Botox injections," says Dr. Shafer of the former rock god turned oddity.

PRISCILLA PRESLEY
"There's no masking the damage to her once-beautiful face," moaned Dr. Lyle Back, who added, "It's left her with a cartoon mask that makeup can't even cover."

PLASTIC SURGERY DISASTERS!

MADONNA
Sad Madge's molten mug makes for a devastating comparison by one of our experts. "Is that Madonna or Boy George?" sniped Dr. Placik, who continued the flogging with, "Her nostrils are sagging. Her face is no longer 'virgin' territory."

JOCELYN WILDENSTEIN
This 75-year-old socialite is now more cat than human. "The question is what she HASN'T had done ... again and again," said Dr. Youn.

CARROT TOP
The comedian's face looks like it's been pureed too long. The entertainer's features are suggestive of steroid abuse, said Dr. Placik, who added, "I thought this was the Cowardly Lion."

DONATELLA VERSACE
Talk about a fashion faux pas! The designer should have gotten this look on the mannequin before herself. "Her cheeks have gone south for the winter," sneered Dr. Placik.

JACKIE STALLONE
It's been one "Rocky" road for the 94-year-old mom of Sly. "(Her lips) are far too large and her mouth is too long, which is sometimes due to the pull of a facelift," sighed Dr. Placik.
