When Botox ES WRONG!

REESE WITHERSPOON, 39

"She seems to be attempting to frown, with no luck," Nashville, Tenn.-based plastic surgeon Dr. Nicholas Sieveking says of the star, whose surgeon appears to "have made an ill-fated attempt to get rid of every forehead line. Rookie mistake!"

JENNIFER GARNER, 43

Jen claims she worries facial freezers will make her forehead look like "a big glacier." It seems she got over that fear! "She has absolutely had Botox in her forehead, as well as near her eyes," says Dr. Rowe. "There is not one wrinkle on her face!"

Sure, they look wrinkle-free. But these frozen stars can barely move their faces!

KATE HUDSON, 36

"There's nothing wrong with a little 'Boty call' if you feel you want it," the actress says of Botox. But Dr. Sieveking notes: "If she was going for the motionless forehead look, she got it."

CAITLYN JENNER, 66

Caitlyn's super-arched brows point to a bigger problem. "The placement of her Botox is accentuating her lumpy and excessive filler," Dr. Sieveking says. "There are good doctors out there, but Caitlyn obviously hasn't found them yet!"

WHY SO SURPRISED, NIC?!

NICOLE KIDMAN, 48

Nicole claims she can "finally move" her face again after ditching Botox – but it doesn't look that way to NYC-based plastic surgeon Dr. Norman Rowe, who suspects "a lot of Botox," he says. "Her facial muscles aren't moving, even though she's in a highly expressive state."

BETHENNY FRANKEL, 45

"I'm not saying I've never done Botox," Bethenny admits. That's a relief, because Dr. Back says it's obvious she has way too much! "Jacked-up eyebrows are a classic sign," he says.

BRITNEY SPEARS, 34

Botox has had a freaky effect on the pretty pop star, says Philadelphia-based plastic surgeon Dr. Lyle Back. "Her forehead has been smoothed so much, we can see the front of her skull bones and hollowed-out temples," he says. "Not a good look!"

VICTORIA BECKHAM, 41

Not so posh! Dr. Back says the ex-Spice Girl is "way overdone. A little Botox here and there would make her look refreshed, but this has the opposite effect. Her mouth is the only part of her face that can still move!"
