

KNIFESTYLES OF THE RICH & FAMOUS

FOREHEAD
 “She appears to have Botox in the frown lines, forehead and crow’s-feet, but has kept her baseline look, with the right eyebrow arched higher,” says Dr. Kenneth Mark. Upkeep is \$2K per year.

NOSE
 Rhinoplasty or makeup? NYC plastic surgeon Dr. Michelle Yagoda isn’t sure. “The tip appears to be lifted and her nose looks thinner. But it could be cosmetics,” she notes. Cost of surgery: up to \$12.5K.

SMILE
 “The most noticeable overall change is that she now has less of a gummy smile, which was likely corrected with Botox [up to \$1K],” says NYC cosmetic dermatologist Dr. Mark.

JAWLINE
 “Her sharp defined jawline – unchanged after 13 years – points to successful Ultherapy,” adds Dr. Mark. The ultrasound lift and tightening runs about \$5K.

Kylie Kicks Up the Botox

Recently engaged pop diva Kylie Minogue looks remarkably radiant and wrinkle-free at age 48. But is it the glow of romance with a younger man (her actor fiancé, Joshua Sasse, is 19 years her junior!) or is the Aussie star getting an assist from her

plastic surgeon? Probably the latter, say experts. “The giveaway is that Kylie hasn’t changed in 13 years!” notes Dr. Kenneth Mark, a NYC dermatologist who does not treat the singer. “I see excellent maintenance with a minimalist approach, optimizing the use

of Botox and Ultherapy.” While Kylie has admitted to Botox sessions in the past, the breast cancer survivor claimed she had given it up to be “more natural.” Now, apparently, she’s dabbling once again. “It seems she has Botox in her brow and crow’s-feet, which

makes her eyes wider with less squinting when she smiles,” says NYC facial plastic surgeon Dr. Michelle Yagoda (likewise not Kylie’s doctor). “She also has likely had Botox injections to lower her upper lip, which previously revealed the gums above her teeth when

she smiled.” Meanwhile, the chart-topper gets high marks for steering clear of the filler craze. “She’s avoided the over-plumped trend [i.e. chipmunk cheeks and trout pouts] we see in many of her peers,” adds Dr. Mark. Score another hit for Kylie! **LS**

The Man’s View

BEFORE OR AFTER PLUMPER POUT?

Julianne Hough

The ultra-fit *Dancing With the Stars* alum seems to get more shapely by the week – and we’re not just talking about her lithe legs and chiseled abs. “Julianne’s lips have been accentuated – not simply ‘enlarged’ – with fillers,” raves Philadelphia plastic surgeon Dr. Lyle Back (not her doctor). “They have a beautiful, natural shape with enhanced sensuality!” While Jules, 27, has never copped to any injectable upgrades, guys we polled were quick to agree with Dr. Back, who adds, “I love her lips!”

MIRACLE IN A TUBE

OUTSMART SKIN SABOTEURS

This just-launched skin defender is the first of its kind to combine pollution and UV protection with DNA Enzyme Complex™, a formula that encourages cells to self-heal and rejuvenate. Complexion perfection, here we come!
